Overview of ATCOM

ATCOM is the leading VoIP hardware manufacturer in global market. We have been keeping innovating with customer's needs oriented , working with partners to establish a total solution for SMB VoIP with IP phone , IP PBX and Asterisk cards

With over 10 years' experience of R&D , manufacturing and service in network and VoIP filed ; mission of creating the biggest value for IP terminals , we commit ourselves in supplying the competitive IP phone and other terminals for IP PBX , softswitch , IMS , NGN providers and carriers; supplying the competitive total VoIP solution for SMB market. We keep improving the customer's experience and creating the bigger value with our reliable

products. Until now, our VoIP products have been available in 100+ countries and used by millions of end users.

- Echo Cancellation
- > SIP Domain name, Authentication
- DTMF(Inband, RFC2833, SIP INFO)
- > Call transfer, Call forward, 3-way conference, Call hold, Call back
- > DND(Do Not Disturb), Auto answer, Blacklists, Block Call-ID, Block
- Anonymous call, Dial plan, IP call

Phone book with 200 records, 200 answered calls, 200 missed calls, 200 dialed calls

- Auto update via HTTP, FTP, TFTP, PNP
- Syslog
- > SNTP
- > WEB access with different login level
- Multi-language: English, Chinese, Farsi, French, German, Hebrew, Italian, Portuguese, Russian, Spanish, Turkish
- Soft button: soft button * 4
- > BLF
- Redundancy SIP server

1.4 Network

LAN/PC:Support bridge mode

Rainbow2 IP Phone User Manual

atcom

- Support PPPoE(ADSL, cable modem used for Internet connecting)
- Support VLAN(DATA VLAN and VOICE VLAN)
- Support L2TP VPN
- LAN support Primary and Secondary DNS
- LAN support DHCP Client
- Support QoS

1.5 Management and Maintenance

- > Support safe mode and firmware updating under safe mode
- Support different level user management
- > Configuration via web , keyboard
- Support multi-language
- > Firmware and configuration file auto provision
- Support system log and call log

1.6 Protocol

- > IEEE 802.3 /802.3 u 10 Base T / 100Base TX
- PPPoE: PPP over Ethernet
- > DHCP: Dynamic Host Configuration Protocol
- SIP RFC3261, RFC3262, RFC3263, RFC3264, RFC3265, RFC2543, RFC3489,
- RFC3842, RFC3515, RFC2976, RFC3428, RFC2327, RFC2782, RFC1889
- > TCP/IP: Transfer Control Protocol/Internet Protocol

Stand bracket installation instruction

A. Put the bottom side of the IP phone upside and press one-side joints of stand bracket into the slot, please refer the picture as below:

B. Press the other side joints into the slot according to the direction of the arrow:

C. It is the right picture after fixing the stand bracket below:

D. Disassemble the stand bracket:

atcom

Push the spring joint of stand and pull the stand according to the direction of the arrow. When the joints are pulled out of the slot, you can take off the stand bracket

Wiring instruction

Plug in the power adapter, cable and handset or headset to the corresponding ports as below picture and press them to the slots on the stand bracket.

Programmable keys' paster using instruction

Step1. Use needle or some other tools to insert into the hole of the plastic sheet, hog the plastic sheet.

Step2. Lift out the plastic sheet

Step3. Take off the plastic sheet

Step4. Use needle or some other tools to insert into the edge of the paster, hog and lift out the paster

Step5. Write down the identification of each programmable key on the paster after taking off the paster

Step6. Put back the paster

Step7. Insert the plastic sheet into the slot

Step8. Push the other side of the plastic sheet into the other slot

Rainbow E's paster using instruction

Steps to use Rainbow E's paster are the same as programmable keys' as below:

atcom

3. Basic functions and operations

3.1 Answer the calls

When there is an incoming call, phone will remind user with ringing. There are 3 ways to answer the call:

A. Answer by handset

Pick up the handset and talk with the caller. If you want to hang up, just put back the handset. When you are talking with the handset and want to switch to speaker or

3.2 Make Call

A. Use the handset

Pickup the handset, the LCD will show the current lines (user is able to switch from line1 to line4 by pressing the line key beside the LCD). Press soft key "Send" to dial the number. When you hear the tones of "du~~du~~" and the phone number your dialed is being displayed on the LCD, the phone at the side of being called should be ringing. If the called party answers this calling, the call is established and the calling timer is started immediately.

B. Use the speaker

Press (wey, the LCD will show the current lines (user is able to switch from line1 to line4 by pressing the line key beside the LCD). Input the phone number and press soft key "Send" to dial the number. When caller hear the tones of "du~~du~~" and the phone number your dialed is being displayed on the LCD, the phone at the

atcom

side of being called should be ringing. If the called party answers this calling, the call is established and the calling timer is started immediately.

C. Use the headset

Press Key, the LCD will show the current lines (user is able to switch from line1 to line4 by pressing the line key beside the LCD). Input the phone number and press soft key "Send" to dial the number. When caller hear the tones of "du~~du~~" and the phone number your dialed is being displayed on the LCD, the phone at the side of being called should be ringing. If the called party answers this calling, the call is established and the calling timer is started immediately.

- D. Dial from phone book
- 1. Press key and input the keypad password 123 to enter the menu and choose "Directory" option. Press "Select" soft key and then find the contact person by navigation keys. When the certain contact person is highlighted, press "Dial" or just pick up the handset to call this number.
- 2. Pick up the handset, press "Directory" soft key, then select the contact person and press "Dial" soft key.
- 3. Pick up the handset, press and enter "Directory", then select the contact person and press "Dial" soft key.
- E. Dial from call history
- 1. Press key and input the keypad password 123 to enter the menu and choose "History" option, then enter sub-directory "Dialed Calls", "Received Calls" or " Missed Calls" to select one of call history entry, and press "Dial" soft key or pickup the handset to call this number.
- 2. Pickup the handset, press "History" soft key, then select one of call history entry, and press "Dial" soft key to call this number.
- 3. Pickup the handset, press 💭 and enter "Call History", then select one of call history entry, and press "Dial" soft key to call this number.

3.3 Pre-dial

It's a method to dial a phone number immediacy at standby mode...

The method is as below:

A, Dial-up the phone number at standby mode

B、Press soft key "Dial" to send out the number

3.4 Multiple line dial-up

Rainbow2 supports 4 SIP lines. That means user can register on 4 different sip accounts simultaneity. User is able to choose line1, line2, line 3 or line 4 by pressing corresponding line key. Line1 is the priority line.

atcom

Rainbow2 maximum supports 8 concurrent calls. When there is an incoming call to another line, LCD will show the incoming telephone number and line LED will be blinking in green. User is able to press the corresponding line key or press soft key "Hold" the current line on which you're talking then press "Answer" to receive the incoming call from another line.

3.5 Hang up the phone

1. Handset hang up

Put back the handset at handset mode, the current calling will be hung up.

2. Speaker hang up

Press (key at speaker model, the current calling will be hung up.

3. Headset Hang up

Press () key at headset model, the current calling will be hung up.

4. Hang up one line call

Press the hook to hang up the current calling when 2 calls happened simultaneously.

3.6 Call Transfer

1. Attended call transfer

The attended transfer allows user to call a third-party before transferring the calling.

While calling, press the "Transfer" soft key to hold the current call and phone the third party. Then dial the target number you want to transfer to on the activated line and press "Send" soft key to call that number. After the target party answers the call, press "Transfer" soft key again to complete the transfer.

2. Blind call transfer

The blind transfer allows user to transfer a call without speaking to the third party. On the user side, the call will be ended as soon as the target phone number is dialed. Operating steps: Press "More" soft key to get more option, then press "Bxfer" soft key, input the transfer target number and press "Send" soft key.

3.7 Voicemail

Rainbow2 has a key for entering voicemail box and indicating new voicemail.

Press key to enter the menu to configure voicemail number if you have never configured it previously. Otherwise, the voicemail number will be called after pressing it. If you want to modify it after configured it, please go to the Account webpage to modify voicemail number.

3.8 Mute calls

The input audio will be not transmitted to peer phone after pressing key, and the phone will be muted even switched among different modes of speaker, handset

and headset. To un-mute, just press 🖉 key again.

3.9 Call Hold

The current calling will be hold by pressing soft key "Hold" or \bigcirc . And the held

call will be resumed after pressing soft key "Resume" or or the corresponding

line key. Even on 3-way conference calling, the conference will be held after pressing "Hold" key, and be resumed to 3-way conference after pressing "Hold" Key again. Remember the conversation is still on hold without being ended even if hung up under the status of hold.

3.10 3-Way Conference Call

To initiate a conference call:

Press "More" soft key on calling to get more options, then press "Conf" soft key to start a conference call. Enter the phone number of the third party and press "Send" soft key to send it out.

1. After the third party answers the call, pressing "Conf" key again to establish the 3-way conference.

2. 3-way conference initiator can press "Exit" soft key to quit from the conference and leave the other two parties still in the conversation.

3. If the initiator hangs up the call or press the "End Conf" soft key, the conference will be ended and the calling between the other two parties will be hung up.

3.11 Call History

Rainbow2 supports 200 missed calls, 200 incoming calls and 200 dialed calls. When the storage is full, the old record will be erased by the new one.

Press "History" soft key or key when Rainbow2 is standby, all the incoming(->), outgoing(<-) and missed calls(!) will be listed. There is another way to check them:

A. Missed call

- 1. Press key.
- 2. Press key and key to select "Call History" then press "Select" soft key.
- 3. Press key and key to select "Missed Calls" then press "Select" soft key.

www.atcom.cn

atcom

- 4. Press key and key to browse the missed call record. If there is no record, the LCD display will be indicated "List is Empty".
- B. Answered call
- 1. Press key .
- 2. Press key and key to choose "Call History" and then press "Select" soft key.
- 3. Press key and key to choose "Answered Calls" and then press "Select" soft key.
- 4. Press key and key to browse the answered call records. If there is no record, the LCD display will be indicated "List is Empty".
- C. Dialed call
- 1) Press key.
- 2) Press key and key to select "Call History" and then press "Select" soft key.
- 3) Press \bigwedge key and \bigvee key to select "Dialed Calls" and then press "OK" soft key.
- 4) Press key and key to browse the dialed call records. If there is no record, the LCD display will be indicated "List is Empty".

3.12 Default Password

Password is needed to access menu and web.

The default password for accessing menu is 123.

There are 2 modes to access web: User mode and Admin mode. All the parameters can be visible at Admin mode while part of them can be visible at User mode.

\triangleright	User Mode	
	Username:user	no default Password
\triangleright	Admin Mode:	
	Username:admin	no default Password

3.13 Check the Phone's IP address

Press \checkmark key, then the status o of the phone will be displayed on the screen and you will see the current IP address of the phone.

3.14 Dial Plan

Dial plan specify the rule to dial number. The Rainbow2 syntax for the dial plan closely resembles the corresponding syntax specified by MGCP and MEGACO. Dial plan is stipulated by the below configurable parameters:

- Interdigit Long Timer——refer to Interdigit long timer for more detail description
- Interdigit Short Timer—refer to <u>Interdigit short timer</u> for more detail description
- Dial Plan

Dial plan contains a series of digit sequences, separated by the `|' character. The collection of sequences is enclosed in parentheses `(` and `)'.

Default: (*xx.|xxxxxxxxxx.)

When user dials a series of digits, Rainbow2 will response in below way:

• No candidate sequences matched, the number will be rejected and display "call ended" on the screen. For instance, the default dial plan only supports digits. And '*' character or letters will be rejected when input them.

- More than one candidate sequences matched, Rainbow2 will wait for more digits input.
- When input timeout occurs, Rainbow2 will dial the input digits.
- When input '#' character, Rainbow2 will dial the input digits.

Digit Sequence Syntax:

- 'x': Matches any one numeric digit ('0' ... '9')
- `[]': Numeric ranges are allowed within `[]'. For example, [389] means `3' or `8' or `9', [3-6] means `3' or `4' or `5' or `6', [235-8*] means `2' or `3' or `5' or `6' or `7' or `8' or `*'.
- '.' : Any element can be repeated zero or more times by appending a '.' Character. For example, 01. matches 01,011,0111,01111,...,011111111...etc.
- `<>': subsequence substitution. For example, `<8:1650>xxxxxxx' would match `85551212' and the first digit `8' will be replaced by `1650' and `16505551212' will be dialed.
- ',': An "outside line" dial tone can be generated within a sequence by appending a ',' character between digits. Thus, the sequence "9, 1xxxxxxxxx" sounds an "outside line" dial tone after the user presses '9', until the '1' is pressed.
- `!': A sequence can be barred (rejected) by placing a `!' character at the end of the sequence. For example, "137xxxxxxx!" will forbid numbers which have 11 digits and start by 137 to be dialed.

Example:

(xxxxxxx|[*#]xxxx|9,1xxxxxxxxx|00xxx!) contains 4 subsequences:

- 1. Allow to dial numbers with 7 digits
- 2. Allow to dial numbers with 4 digits and start by `*' or `#'
- 3. Allow to play an "outside line" dial tone after pressing '9' and dial numbers with 11 digits and start by 1
- 4. Forbid to dial numbers with 5 digits and start by 00

4. Web settings

Enter Rainbow2's IP address in the web browser and press 'Enter' key to access Rainbow2's user webpage.

Click "admin" which is on the right corner to enter administrator webpage.

NTP Server:	pool.ntp.org	
Time Zone :	(GMT+08:00)Beijing	, Chongqing, Hong Kong, Urumqi 🗸 🗸
© Manual		
Set Local Date(YYYY/mm/dd) :		
Set Local Time(HH:mm:ss) :		
Daylight Saving Time		
Daylight Saving Time :	No 👻	
Daylight Saving Time Rule :		

NTP: Network time protocol

- 1. NTP Server: Set NTP server address, which can be IP address or domain name.
- 2. Time Zone: Choose your own time zone.
- 3. Daylight Saving Time: whether to enable Daylight saving time.
- 4. Daylight Saving Time Rule: This parameter is a rule with three fields, each field is separated by semicolon; as show below:

Start=<start-time>; end=<end-time>; save=<save-time>

<start-time> and <end-time> specify the start and end date of daylight saving time, month/date/week and <save-time> is the amount of hour/min/sec to add to the current time during daylight saving period. The <save-time> value can be preceded by a negative (-) sign if subtraction is desired instead of addition.

If <weekday > is 0, it means the date to start or end daylight saving is at exactly the given date. In that case, the <day> value must not be negative. If<weekday >is not zero, then the daylight saving starts or ends on the <weekday >on or after the given date if <day> is positive, or on or before the given date if <day> is negative. If

atcom

<day> is -1, it means the <weekday> on or before the end-of-the -month (in other words the last occurrence of <weekday> in that month)

Optional values inside [] are assumed to be 0 if they are not specified. Midnight means 0:0:0 of the given date.

E.G. start=4/1/7/8:00:00;end=10/1/7/9:00:00; save=-1Start time is 1st April, Sunday, 8:00:00 am. End time is 1st October, Sunday, 9:00:00 am. The display time will be one hour early than the standard time.

Manual

- 1. Set Local Date(YYY/mm/dd): manually set local date or click ¹/₂ to choose local date .Format: year/month/day.
- 2. Set Local Time(HH:mm:ss) : manually set local time or click 😒 to adjust local time. Format: hour/minute/second. e.g. 12:00:00.

4.5.2 Features

Speed Dial

> Speed Dial

Speed Dial 2 :	Speed Dial 3 :	
Speed Dial 4 :	Speed Dial 5 :	
Speed Dial 6 :	Speed Dial 7 :	
Speed Dial 8 :	Speed Dial 9 :	

Set speed dial for 2-9. For example, set Speed Dial 2: 123456789, then if you press 2, 123456789 will be dialed immediately. 3/4/5.../9 also can be set as speed dial.

> Call Forward

Call Forward

Always Target:		Busy Target:	
No Answer:			
After Ring Time(Seconds) :	5		

- 1. Always Target: Every incoming call will forward to this target.
- 2. Busy Target: The incoming call will forward to this target when Rainbow2 is busy.
- 3. No Answer: The incoming call will forward to this target when there is no answer.
- After Ring Time (Seconds): After this time, the incoming call will be forwarded to the no answer target. Defaults to 5. The priority of Always Target is highest when Always Target, Busy Target and No

Answer Target have been set. This means all the incoming call will be forwarded to the Always Target.

Rainbow2 IP Phone User Manual		atcom

4.5.3 Voice

Echo Cancellation

1. VAD: Whether to enable VAD(Voice Active Detection). If enable, RTP packets will not be send when Rainbow2 is mute.

atcom

2. CNG: Whether to enable CNG(Comfort Noise Generator). If enable, comfort noise will be send to the far end to let it perceive the activity of the conversation when Rainbow2 is mute.

Jitter Buffer

Rainbow2 can buffer incoming voice packets to minimize out-of-order packet arrival. This process is known as jitter buffer.

- 1. Type: Choose type of jitter buffer. When choose Fixed, the size jitter buffer is fixed. When choose Adaptive, the size of jitter buffer is the sum of Min Delay and the size of RTP packets.
- 2. Min Delay: The minimum delay of the jitter buffer.
- 3. Max Delay: The maximum delay of the jitter buffer.
- 4. Normal Delay: It is used for fixed jitter buffer which should be between Min Delay and Max Delay.

4.5.4 Ring

- 1. Redial: Record of dialed list, maximum 200 records.
- 2. Received: Record of received list, maximum 200 records.
- 3. Missed: Record of Missed list, maximum 200 records.

5. FAQ & Trouble Shooting

Frequently Asked Questions

5.1 How to make a factory reset

There are three ways to make a factory reset:

- 1. Factory reset from keyboard, steps are:
- a) Press and input password 123.
- b) Find and select '12 Factory Reset'.
- c) Press 'OK', then the phone will restart automatically and factory reset.
- 2. Factory reset through web, please refer to Reset & Reboot;
- 3. Factory reset during rebooting, steps are:
- a) Keep pressing `*' and `#' key.
- b) Plug in the power adapter.
- c) Wait for about 5 seconds and Rainbow2 will reset to factory after rebooted.

5.2 Upgrade firmware under safe mode

If the phone could not start up normally, upgrade firmware under safe mode. Steps are:

- 1. Build a TFTP server and set its IP address as 192.168.1.200.
- 2. Copy the firmware to the root directory of the TFTP server and modify the file name as Rainbow2.FW.
- 3. Make sure the TFTP server and the phone are connecting with the same switch and reachable to each other;
- Keep pressing `#' key and start up the phone until the LCD displays `Upgrading...';
- 5. The phone will download the firmware from the TFTP server;
- 6. After the download is done, the phone will upgrade automatically;
- 7. After the update is finished, the phone will start up with the factory configuration.

5.3 How to make direct IP call

When hook off/ pressing speaker or headset key,

1. Press soft key 'Num' until it switch to 'IP'.

2. Using `*' key to input `.'. If user wants to dial 192.168.1.100, then press 192*168*1*100.

3. After inputting the IP address, press dial key to dial it out.

6. Trouble Shooting

6.1 The phone can't register successfully

- 1. Check the IP address, and if the mode of WAN port is DHCP, please make sure the DHCP server is in service.
- 2. Check the gateway.
- 3. Check the DNS.
- 4. Make sure the information of the account is consistent with which offered by the service supplier.
- 5. Make sure the SIP server is on.
- 6. Check the port of the SIP server whose default value is 5060.

6.2 The phone can't obtain IP address

- 1. Make sure the cable has been connected to the LAN port of the phone.
- 2. Make sure the cable and the switch's port that connected with the cable is available.
- 3. Make sure the DHCP server is on and there are some assignable IP addresses in the address pool.
- 4. Try to change the LAN port mode as Static.

6.3 Only one part can hear the voice during the call

- 1. Make an IP dial-up call to make sure the telephone receiver and microphone are normal.
- 2. Enable STUN on web page.
- 3. Set STUN server as stun.sipgate.com.
- 4. Click 'submit' and wait for the phone to restart.
- 5. Try to make calls again.
